#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 13 March 2006.  
 2a) This action is **FINAL**.                    2b) This action is non-final.

**DETAILED ACTION**

1. This is the initial Office action based on the 10/571741 application filed on March 13, 2006.
2. Claims 1-17 are pending and have been fully considered.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over LAL et al. (EP 0626442).

With respect to claims 1-17 LAL et al. discloses a major amount of a fatty carboxylic acid ester composition from the transesterification of at least one naturally occurring triglyceride (rapeseed oil) (page 4 lines 10-15) and a pour point depressant. The alcohol utilized in forming the transesterified esters are an aliphatic group that contains from 1 to about 24 carbon atoms such as methyl alcohol (page 4 lines 32-36). The pour depressant comprises one or more esterified copolymer of an alpha-olefin or styrene and an alpha, beta-unsaturated monocarboxylic or dicarboxylic acid or maleic anhydride, wherein the copolymer is esterified with a mixture of a relatively high molecular weight alcohol (at least 8 carbon atoms) and a relatively low molecular weight alcohol (no more than 7 carbon atoms). The ratio of the high molecular weight alcohol to low molecular

weight alcohol is within the range of from 2:1 to 9:1 (page 7, line 1- page 8, line 54). The discovery of an optimum value of a known result effective variable, without producing any new or unexpected results, is within the ambit of a person of ordinary skill in the art. See *In re Boesch*, 205 USPQ 215 (CCPA 1980) (See MPEP § 2144). The pour point depressant is an ester of a carboxy-containing interpolymer, having a reduced specific viscosity of from about 0.5 to about 2 (page 7 lines 3-5). The interpolymerizable comonomers include methyl methacrylate (page 8 lines 38-40). The carbonyl polyamino groups include those derived from polyamino compounds having one primary or secondary amino group (page 8 lines 4-5). The fuel composition comprises a major amount of liquid fuel wherein the fuel comprises a petroleum distillate and diesel fuel (page 2 lines 6-10 and claim 14).
